

Amendments to the Claims:

This listing of claims replaces all previous versions, and listings, of the claims in this application.

Listing of the Claims:

Claim 1 (cancelled)

Claim 2 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are bent in the form of an arc.

Claim 3 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are bent at an [angel] angle.

Claim 4 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are S-shaped.

Claim 5 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are faceted, for example, they may be tri-, tetra-, penta-, hexahedral.

Claim 6 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are dome-shaped.

Claim 7 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are made in the form of paraboloid of revolution.

Claim 8 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are in the form of a series of spheres having equal or different diameter.

Claim 9 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are made with polished or [mat] matte outer surface or with a combination of both types of surface state.

Claim 10 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are made with polished outer surface.

Claim 11 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are made with [mat] matte outer surface.

Claim 12 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are made with a combination of both polished and [mat] matte states of surface.

Claim 13 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are made with shaped surface[, for example, corrugated surface].

Claim 14 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are decorated with natural or artificial precious, semiprecious or ornamental stones taken separately or together or in different combinations.

Claim 15 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are decorated by chasing.

Claim 16 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the tubular elements are decorated with an ornament executed with the use of the partitioned enamel technique.

Claim 17 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the settings with stones contain natural or artificial precious, semiprecious, ornamental stones taken separately or together or in various combinations.

Claim 18 (currently amended) A composite set of jewelry ornaments according to [claim 1] claim 19, characterized in that the connector is made in the form of a chain, a purl or a thread.

Claim 19 (new). A composite set of jewelry ornaments comprising:

(a) a connector in the form of a thread or a chain;  
(b) a lock,  
(c) tubular decorative elements, the ratio of length to diameter of tubular elements being in the range of from 1/1 to 30/1, the tubular elements being provided with one or more cross-through openings to pass the connector, and  
(d) decorative elements in the form of settings with stones, all decorative elements being strung on the connector,

wherein all components of the set are made of precious metals or alloys thereof or plated with precious metals or alloys thereof.

Claim 20 (new) A composite set of jewelry ornaments according to claim 19, characterized in that the tubular elements are made with a corrugated surface.

Claim 21 (new). A composite set of jewelry ornaments comprising:

(a) a connector in the form of a thread or a chain;

- (b) a lock,
- (c) tubular decorative elements, the ratio of length to diameter of tubular elements being in the range of from 1/1 to 30/1, the tubular elements being provided with one or more cross-through openings to pass the connector, and
- (d) decorative elements in the form of settings with stones, all decorative elements being strung on the connector,
  - wherein all components of the set are made of precious metals or alloys thereof or plated with precious metals or alloys thereof;
  - wherein the tubular elements are selected from the group consisting of:
    - (1) tubular elements that are bent at an angle;
    - (2) tubular elements that are S-shaped;
    - (3) tubular elements that are faceted; and
    - (4) tubular elements that are made in the form of paraboloid of revolution.
